

**YOGYAKARTA , 10 – 14 NOVEMBER 2014
INDONESIA**

**22nd RSC MEETING OF IHP 2014
IN CONJUNCTION WITH
INTERNATIONAL CONFERENCE ON
ECOHYDROLOGY**

IHP-INDONESIA

International Conference on Ecohydrology 2014 (ICE 2014)

- **Theme : “Ecohydrology approaches facing the global water environment challenges”**
- **Date : 10 – 14 November 2014**
- **Venue : Melia Purosani Hotel, Yogyakarta – Indonesia**

LOCATION OF MEETING

YOGYAKARTA AIRPORT

Bandara Adisucipto Yogyakarta

Opening Ceremony: by Governor of Yogyakarta in the Sultan Palace

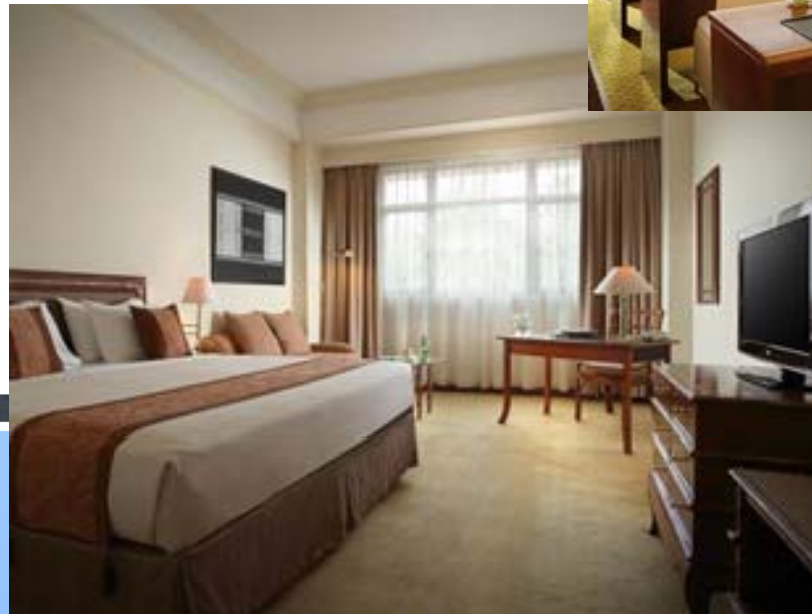

Sultan Hamengku Buwono X : The Governor of Yogyakarta Provinve

HOTEL MELIA PUROSANI, YOGYAKARTA

HOTEL FACILITIES

Background

Global water environment has deteriorated and there has been significant loss of biodiversities worldwide, which severely impacts global ecosystems.

Ecohydrology aims to find solutions emphasizing on sustainable water resource policies and promote social development.

One of the fundamental concepts involved in ecohydrology is that the timing and availability of freshwater is intimately linked to ecosystem processes, and the goods and services provided by freshwaters to societies

Ecohydrology considers the functional interrelations between hydrology and aquatic ecosystems and their biota at the catchment (watershed) scale.

The Indonesian Institutes of Sciences (LIPI) proposed to carry out a couple of linked activities on “Ecohydrology for managing sustainable water futures”

OBJECTIVES

The objectives of ICE 2014 is to synthesize information and knowledge gaps for addressing issues related to critical water environment systems (how the ecohydrology and ecotechnology providing low cost environmentally sound technology for sustainable water management, especially in the Asia Pacific region)

The program aims to promote the understanding of concepts and systems and enhances knowledge regarding tools and technologies for enabling innovative planning and action from a new perspective and approach on managing water resources. The experiences and on-going projects related to terrestrial ecosystems processes, water issues in landscapes, rivers, floodplains, wetlands, reservoirs, coastal and urban areas will be discussed in the Conference.

INTENDED PARTICIPANTS

Keynote speakers are those who have expertise in ecohydrology and terrestrial ecosystems processes, especially in the interrelationship between water resources, ecosystems and community livelihoods

Participants with keen interests in improving the environment and strong background in natural and biological sciences, environmental engineers and related field of expertises including agricultural engineers, scientists, researchers, and university instructors.

Total of 200 participants are expected nationally and internationally from the Asia-Pacific region

PROPOSED PROGRAM

ICE 2014 will consist of a two days international conference and one day technical fieldtrip . It will be open to interested scientists and engineers, as oral presenter, presentating poster or simply as participants. The Conference consist of plenary and three grouped sessions.

Current trends and
critical water
environmental
challenges

Methods and models
in water
environmental issues

Ecohydrological approaches to biodiversity conservation, environmental management, and ecological restoration;
Disturbance and dynamics in natural and anthropogenic ecology and hydrology;
Relationships among ecological pattern and hydrological process;
Integrating hydrology with ecological planning, design, and architecture, or reverse;
Transdisciplinary studies of regional sustainability from scopes of ecohydrology, ecology, or both.

DATE AND VENUE

Time : 10 – 14 November 2014

Arrival	9 November
International Conference	10-11 November
Technical Field trip	12 November
RSC Meeting of IHP	13-14 November
Closing	14 November
Departure	15 November

MELIA PUROSANI HOTEL

REGISTRATION

Early
registration is
highly
appreciated

Registration +
Conference +
fieldtrip USD
200.-

Payment should
be made in
cheque or CASH
order directed
to: APCE/LIPI
Cibinong

The fee covers conference kits and meals during the events; however, it does not cover travel expenses from and to country of participants or accommodation during the conference.

THANK YOU
