

Mae Nam Bang Pakong

Map of River

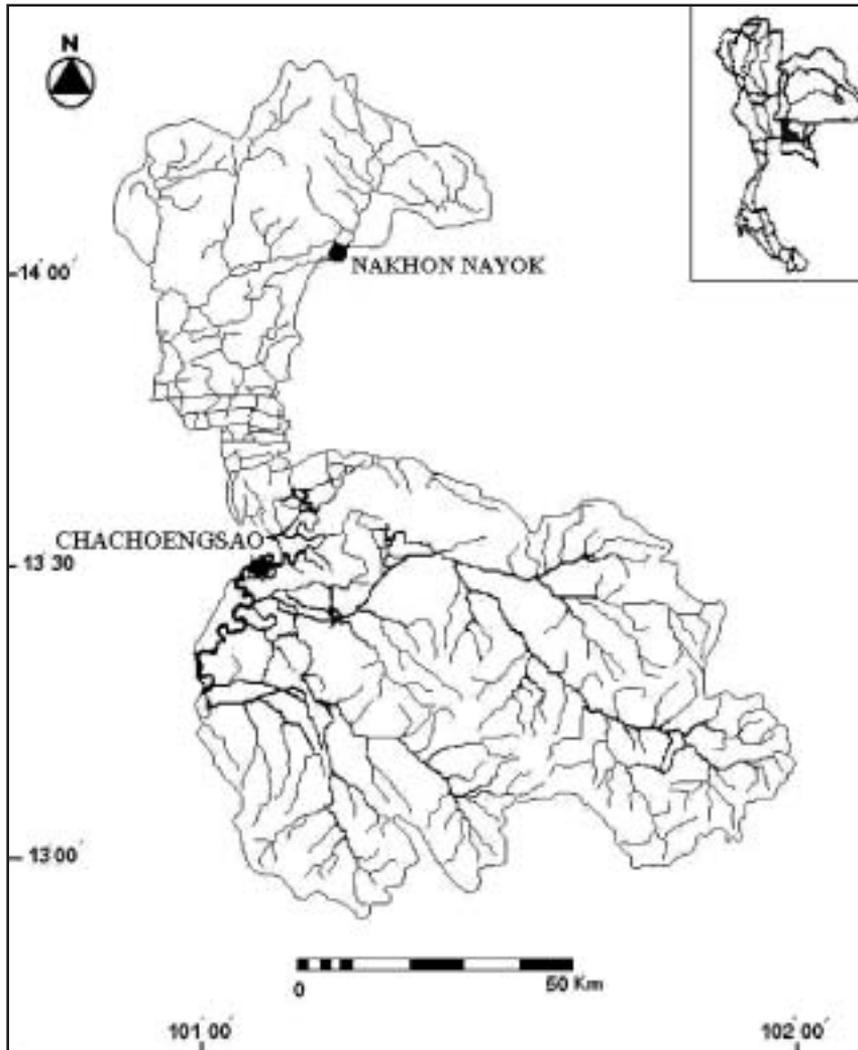

Table of Basic Data

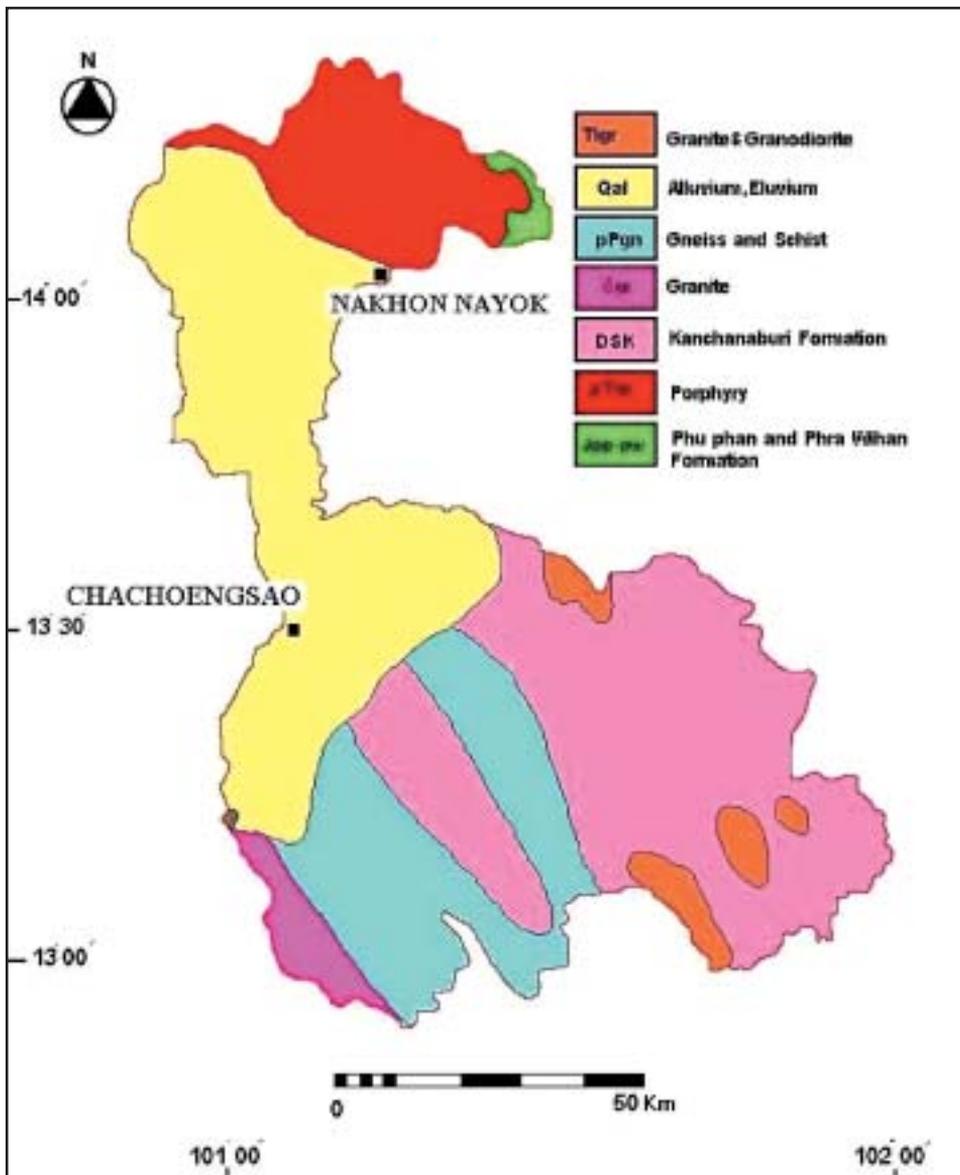

Name: Mae Nam Bang Pakong		Serial No : Thailand-7
Location: Eastern sub-region of Thailand	N 13° 05' - 14° 30'	E 100° 57' - 102° 00'
Area: 8,706 km ²	Length of main stream: 434 km	
Origin: Kead Mt.	Highest point: 1,351 m (A. Banna, Nakhonnayok)	
Outlet: Gulf of Thailand	Lowest point: 1 m (A. Bangpakong, Chachoengsao)	
Main geologic formation: Alluvium, Eluvium, Kanchanaburi Formation, Rataburi Formation, Phu Phan and Phra Wihan Formation, Porphyry, Tarutao Formation, Granite&Granadiorite, Gneiss and Schist		
Major tributaries: Nakhonnayok River (2,543 km ²), Khlong Tharat (2,965 km ²), Khlong Luang (798 km ²), Bangpakong (2,400 km ²)		
Major reservoirs: Khlong Siyat Dam (325x10 ⁶ m ³ , 1998), Khlong Rabom (252x10 ⁶ m ³ , 1998), Khlong Luang (135x10 ⁶ m ³ , 1998), Huai Prea reservoir (8.3x10 ⁶ m ³ , 1988)		
Mean annual precipitation: 1,895 mm (1952 - 1996) station 03160501 A.Mueang, Chachoengsao		
Mean annual runoff: 9.02 m ³ /s (1969 - 1996) station 01160302 Ban Takloi, A. Sanamchaikhet, Chachoengsao		
Population: 1,503,988 (1998)	Major cities: Chonburi, Chachoengsao, Nakhonnayok, Prachinburi, Saraburi	
Land uses: Forest 10.6%, Rice paddy 48.1%, Upland crops 39.2%, Orchard 1.9%, Water resources 0.2% (1998)		

1. General Description

The Mae Nam Bang Pakong merges with the Mae Nam Prachinburi at A. Bang Nampriao, Chachoengsa, and drains into the Gulf of Thailand at A. Bangpakong, Chachoengsao. The basin area is approximately 8,573 km² and the main river reach length is approximately 241 km. The majority of the basin area is a low plain and is affected by seawater intrusion in the dry season, resulting in brackish water during the months of January to April.

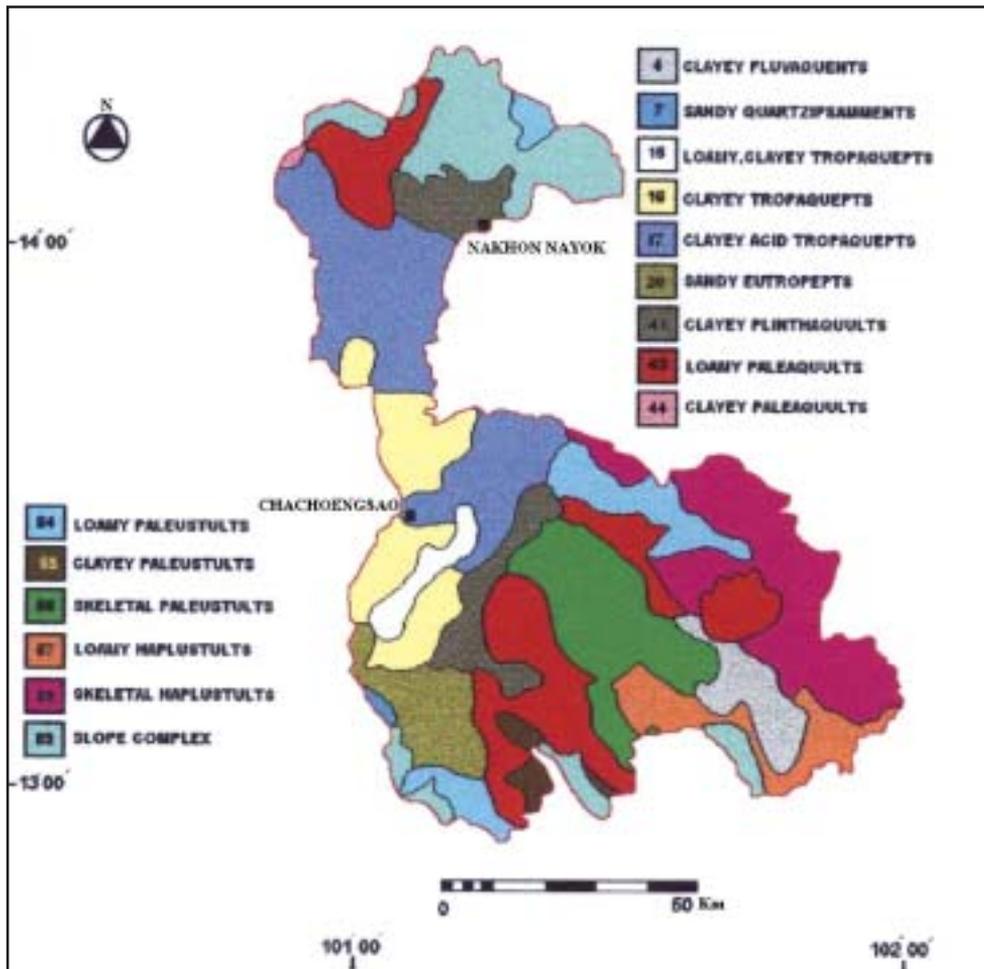

2 Geographical Information

2.1 Geological Map

6. Socio-cultural Characteristics

The Mae Nam Bang Pakong River originates from the mountain ranges in the eastern sub-region covering the provinces of Chachoengsao, Nakhonnayok, Chonburi, Prachinburi and Saraburi. The population of this sub-region is similar to that of the Central Plain in terms of culture, language, religion and beliefs. The people living on the low lying river plain are mainly involved in agriculture. Water related festivals are the Songkran and the Loy Kratong. There are also other provincial festivals, for example the Buffalo Race and Rice Piling contests in Chonburi. In general, people in this region are diligent, but conservative, and prefer a peaceful life. The beautiful natural resources, like waterfalls and the long coastline, attract tourists all the year round. In addition there exist deep water sea ports catering for international cargo ships. These favorable economic basin conditions make the people of the area well off with relatively high annual incomes.
